

SYNTHETIC MEDICAL REPORT - RAG TEST SAMPLE

Not a real medical record. Fictional data generated for document-processing and retrieval testing only.

Patient Name	John Doe	Report Date	14-May-2026
Patient ID	SYN-PT-00042	Visit Type	Outpatient follow-up
DOB	01-Jan-1980	Clinician	Dr. Synthetic Example

Clinical Summary

John Doe presented with three days of productive cough, mild fever, and fatigue. Oxygen saturation was stable on room air. The clinician noted scattered right lower lung crackles without respiratory distress. This sample intentionally separates structured lab results in the table from medication instructions embedded as a raster image below.

Structured Table - Basic Lab Panel

Test	Result	Reference Range	Flag
WBC	12.4 x10 ⁹ /L	4.0 - 11.0	High
Hemoglobin	13.8 g/dL	13.0 - 17.0	Normal
Platelets	245 x10 ⁹ /L	150 - 400	Normal
C-reactive protein	18 mg/L	< 5	High
Creatinine	0.9 mg/dL	0.7 - 1.3	Normal

Embedded Image - Raster Text Slip, Not Copyable Text

The following embedded image contains medication instructions as pixels. It is deliberately different from the lab table above.

RASTER IMAGE: PHARMACY INSTRUCTION SLIP
Patient: John Doe RX ID: SYN-RX-1047 Medication: Amoxicillin 500 mg capsule Directions: Take 1 capsule by mouth every 8 hours for 7 days. Start Date: 14-May-2026 Quantity: 21 capsules Warnings: Take with food. Complete full course unless advised. Follow-up call if rash, wheezing, or severe diarrhea occurs.

Assessment and Plan

Assessment: suspected uncomplicated bacterial lower respiratory infection with elevated inflammatory markers. Plan: oral antibiotic course as shown in the raster image, hydration, acetaminophen as needed for fever, and follow-up in 72 hours or sooner for worsening symptoms.
